

DO YOU NEED A LIGHT BUT STRONG CUSTOM EXTRUSION APPLICATION?

Time Saving Work Tables – Versatile Framing Systems – Powerful Mounting Platforms – Custom Control Cabinets

Dixon Engineering & Sales Co. is the exclusive representative in NC and SC for A-Line Corporation, a market leader of customized Aluminum Extrusion Fabrications.

Elegant Solutions

A-Line builds with aluminum extrusions, more commonly known as t-slots. This strong and lightweight product can be configured into almost anything you can imagine.

Materials Science Base

This base required very precise fabrication for positioning the small-angle x-ray scattering instrumentation installation.

Finish the Look

You choose from Lexan, PVC, Polyethylene, Acrylic, Laminates, Composites, Glass and ESD Materials.

Lab Structure

This base required it to support a 2,500 lb. optics table with pneumatic vibration isolators.

Skills Translate to All Industries

A-Line adds value and meets tight specifications. We produce at a high level because of our experience in the Calibration, Materials Science and Process Technologies space. Trust A-Line Automation's fabrication team to solve your problem, improve your productivity and deliver the highest quality work.

Medical Device Stand

This medical device stand was designed to ease operator fatigue and be able to switch from vertical to horizontal in order to produce multiple products.

Want to learn more about A-Line Automation and their complete product line? Click [here](#) to visit their website. If you have an application with which we can be of assistance, contact us and we will be happy to review it with you. Bring us your ideas and we can help bring this to reality.
