INTER-LAKES BASES is known for being a leading builder of standard and custom machine bases and weldment designs. They also excel in the fabrication and machining of plates and dials. Take a look at what Inter-Lakes can do for you.

- ◇ Inter-Lakes can provide steel, aluminum or stainless for you plate or dial.
- ◇ All plates and dials can be customized to your dimensions, finished to your specific thickness & machined to your own prints. ILB can machine on the top, bottom and even the sides of the plate.
- ◇ Inter-Lakes can Blanchard grind up to 153" corner-to-corner and fabricate steel plates up to 6" thick.
- ◇ Special tolerances and Mattison grind available.
- ◇ Steel/flame, plasma cutting and high-def plasma cutting available.
- ◇ Plates and dials can have special coatings, such as Anodizing, Electroless Nickel, Black Oxide and Teflon. They can also be painted or powder coated.
- ◇ Steel plates are thermally stress relieved at 1100° for a minimum of one hour per inch of thickness and are cooled in accordance with ASTM standards.
- ◇ Turnkey plates ready for your unique applications.
