

# HAND HELD INK JET PRINTERS OFFER FLEXIBLE & MOBILE MARKING SOLUTIONS

**DURABLE TECHNOLOGIES**  
Experience the Durable Difference

If you are looking for a portable ink jet printer that's versatile, rugged, virtually maintenance free and easy to use, then you'll want to know more about Durable Technologies' [HandJet 260](#) mobile printer.

This battery-operated printer offers great mobility and can print on a variety of materials, including both porous and non-porous substrates, as well as uneven surfaces and irregular shapes. This printer is capable of printing large characters (up to 2.2" tall), including date codes, sequential numbers, logos, and 2D bar codes.

The HandJet 260, with its patented print technology, offers an affordable upgrade to traditional hand coders (such as stencil machines, rubber hand stamps and roller coders). This portable ink jet printer is perfect for a wide range of applications where product identification and portability is a must. Single- or multi-line messages from .276" to 2.2" high can be printed in a single pass, up to four separate lines of code at a time. Plus, the capacity of the ink cartridge has been increased to up to 200,000 characters in a 7 x 5 dot matrix!

A variety of colors are available, including black, white, light blue, and yellow. For nearly effortless cleanup, a handy cleaning cartridge can be installed in just seconds to aide in the removal of ink and flush the system.

Communicating with the HandJet 260 is simpler and more versatile: choose from WiFi, Bluetooth or USB. Weighing in at slightly over 3.5 lbs., this portable ink jet printer offers a convenient, easy to use, flexible solution for marking on large crates, steel beams, pallets and much more.

## Technical Data:

- Black, White, Light Blue and Yellow ink cartridges available (up to 200,000 characters per cartridge using a 7x5 dot matrix!)
- Character Sizes: from .276" up to 2.2"
- Print Resolution: 16 dpi
- 3.5" color display, hardened glass touch screen

- Printer Memory: 2 GB
- Power Supply: External, 24V, 1.25 amp power pack
- Weight: 3.5 pounds (approximately)
- Formats include alphanumeric text, automatic date and time, sequential numbering (serializing), logos, and bar codes
- Minimum size of part to be marked: 1.57"
- Capable of printing in any orientation, including in an arc
- Laser guidance for improved message positioning
- Available options: print stabilizers, guide wheels, scanners, carry bags, and more

For more information about the HandJet 260, or any of the other product marking equipment available through Durable Technologies, please visit their [website](#) or contact Dixon Engineering and Sales Co. for assistance with an application.
