***You may know Gate Technologies (formerly CDS)...***

...as a leading designer and manufacturer of precision motion control products such as indexers, precision link conveyors and parts handlers. They have long been known as a leader in cam actuated mechanical drives and machinery offering high speeds, precise positioning and unmatched reliability.

***We would like to highlight three specific products for you to learn more about...***

**TL Series Precision Link Transfer Conveyor**

**Precision Link Conveyors - TSL, TL And TXL Series:**

- Provide the industry's highest accuracy and repeatability for automated assembly and manufacturing machinery platforms, combined with the highest dynamic performance available on the market.
- Configurable for fixed indexing or flexible positioning.
- Certified for Medical, Pharma & Clean Room applications.
- Modular design for flexible platform configurations. Completely customizable solutions available for your application!
- They are used on machines that require stability, precision, high accuracy and speeds, flexibility and low maintenance.
- The competitive price and fast lead time, together with CDS quality and reliability, make this series very attractive for the market.

## TRP Series Work Positioning Package Solutions

### TRP Series Standard Package Tables:

- Quick delivery of robust solutions designed for heavy duty applications with accurate positioning.
- The TRP Series is the package version of the TR Rotary Table. They are equipped with a gearbox and three-phase induction motor for shorter lead-times.
- This series, a perfect solution for an application with high inertia and highly unbalanced loads, is backlash free and features an oversized center through hole for routing cables and wires.
- The 'friction followers' technology inside ensures a vibration-free and backlash-free rotation at high speed, high positioning accuracy and a maintenance-free long life.

## HTR Series Servo-Flex for Clean Room Requirements

**The HTR Ring Table Series:**

- Sleek, low profile design provides applications that are backlash free, have highly accurate positioning and feature an oversized center through hole for routing cables and wires.
- The low-profile fits the table into every project.
- The load-bearing housing makes it easier to use - no extra supports or structure must be added.
- The squared and hollow-free design is perfect for clean-room applications.
- The 'friction followers' technology inside ensures a vibration-free and backlash-free rotation at high speed, high positioning accuracy and a maintenance-free long life.
